

Knowledge Check Assessor Guide

ASSESSOR COPY. Accept equivalent safe responses in a language the employee understands. Critical items must be corrected and reassessed; the guide alone is not employee evidence.

1. What do you do before starting to clean an area?

Inspect the area, identify hazards and confirm it is safe to proceed. CRITICAL ITEM.

2. What must you do before using a cleaning chemical?

Check approved product instructions, label and required PPE; know SDS access; never mix products. CRITICAL ITEM.

3. What is the correct spill-response order?

Secure the area, place warning signs, use the approved method, inspect before reopening. CRITICAL ITEM.

4. What do you do with broken glass, sharps or unknown hazardous material?

Stop direct handling, secure/report the concern and follow the trained site procedure. CRITICAL ITEM.

5. Can you enter any airport area if a coworker opens the door?

No. The employee needs actual authorized access; any escort must follow airport rules. CRITICAL ITEM.

6. What must be done when emptying a trashcan?

Empty appropriately, replace the liner and leave the area clean.

7. Which surfaces are covered in elevator cleaning?

Doors, buttons, glass and floor within authorized cleaning scope.

8. When can you mark a task complete?

Only after doing the work and providing required evidence.

9. What if the time clock or GPS does not work?

Notify the supervisor, use the approved actual-time fallback and request an audited correction.

10. What do you do when a hazard remains at the end of a shift?

Secure/report the hazard, document unfinished work and hand it over to the supervisor. CRITICAL ITEM.
