

Site Orientation and GOAA Clock-In Checklist

GOAA site timekeeping and Marvol time records must reflect actual work. Do not share accounts or assume the app is the only emergency channel.

Employee and site

Employee full name

Employee ID / hire reference

Role / work location

Prepared by / date

Local safety information

Actual emergency number / contact

Assembly point / exits / evacuation route

Incident reporting route / immediate-call contact

SDS location / approved product list

Storage / supply locations / approved equipment

Authorized areas / airport access boundaries

Pedestrian / vehicle controls / site hazards

Site Orientation and GOAA Clock-In Checklist

Employee workflow

At the start of the shift: Sign/Clock in to the GOAA portal on the ground floor using the employee's own authorized credentials. Record actual time in Marvol through the approved process. Follow the assigned cleaning route, report hazards promptly, complete only work actually done, perform final inspection and hand over unfinished work. If either timekeeping system fails, notify the supervisor and use the approved actual-time fallback.

Demonstration

GOAA ground-floor sign/clock-in demonstrated / date

Own Marvol sign-in / time / breaks / correction demonstrated

Assigned tasks / photos / incident / supplies demonstrated

Final inspection / handover demonstrated

Questions / supervisor responses

Confirmation

Employee typed signature / date

Reviewer typed signature / date
